The Committee considered the representation of the students TIRE (BCT) VI<sup>th</sup> Sem  
Examination, 20-18 in the paper SC391A10.E.II: Finite Element methods  
alongwith the comments of the teacher concerned and the Head of the Department.

The Committee is in agreement with the observation made by the Head of the Department hence no action is required on the representation.

As pointed out by the teacher and endorsed by the Head of the Department, the Committee recommends that the mark of Question No. (s) 3(b) & 4(b) out of syllabus

alongwith the comments of the teacher concerned and the Head of the Department. (EC/ECC)

The Committee is in agreement with the observation made by the Head of the Department hence no action is required on the representation.

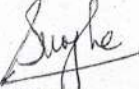

As pointed out by the teacher and endorsed by the Head of the Department, the Committee recommends that the mark of Question No. (s) (5) be given out of 20

Therefore each question should be of 20 marks. Accordingly in question no. 5 if the student has attempted this question marks should be awarded out of 20 and the revision be made accordingly.

The average of the marks of all the questions be calculated ignoring the defective question (either attempted or not) or ignoring the lowest marks where another question has been attempted in place of defective question.
