---

Although University is not able to provide seed money to its teachers for research due to shortage of funds and pension liabilities, but many of the faculties have received start-up grants for research in the recent years from major funding agencies, such as DST and UGC. Some departments are sponsored by UGC and DST under Special Assistance Programs for research, such as DRS/CAS, COSIST, FIST etc. The University is having world-class research facilities including DBT-sponsored micropropagation & hardening Unit, Modular Plant Functional Genomics lab, Microbial Genomics lab, Plant growth chambers/glasshouse, Animal house etc. Beside this, University has MOUs with several reputed research institutions, and teachers are having academic and research collaborations with IITs, AIIMS, CSIR/DBT/ICAR and many other national and international institutes of eminence, in form of networking and multi-institutional research projects, patents and research publications (as shown in criteria 3.1.6, 3.2.2, 3.4.2, 3.4.3, 3.4.5, 3.7.1, 3.7.2). Some teachers of the University were also recognized among top 2% scientists of the world by Stanford University, California, for their excellent contribution in their research fields. All departments are offering Ph.D. programs in their respective fields, and University is providing basic facilities, lab space/infrastructural and contingency support to its teachers and scholars for research.
